Puppies must be current on all veterinary recommended vaccines.
Health Certificate must be shown to instructor at time of class.
This class is a precursor to the Canine Good Citizen Program and Basic
Manners/Family Dog class.

This is the most important class your dog will ever attend.

The most common reasons that dogs are surrendered to rescues is lack of training and socialization in the first year of life. This fun-filled class features ample off-leash socialization and provides a strong foundation in basic training fundamentals.

I keep current in the latest developments in puppy training/behavior, attending numerous classes and seminars in early puppy development and education.

Training behaviors that are covered in this class are: dealing with puppy biting/nipping; socialization (dogs, people, places, things, sounds, sights, etc.); focus, resource guarding; teaching your puppy to like handling and gentle restraint (important for fear free veterinary visits; focus and attention (which is important in human/animal bonding; establishing a daily routine; fast-tracking housetraining/chew training; recalls (coming when called); basics including: sit, down, stay, leave it, touch, wait at doors, etc. ; leash walking (tips on dealing with pulling, not walking, reactivity); building better responses around distractions; confidence building; preventing common behavior problems; nutrition and exercise; and preparing for adolescence.

Puppies must be between 5 Months and less than 12 Months of age.
